similar to Delicious where you can add a URL with an optional description and tags

Read more Downloadable Drupal Features Friday, 10 June, 2011 - 21:29 If you haven't heard about it Features allows you to create/download pre-setup features which are already set up to do pre-existing tasks.

Lightbox2 doesn't have a D7 release at the time of writing and Thickbox has been discontinued, with the maintainer now working on Colorbox.

The main problem with this is ending up with one theme for all, to get around this with out having to do any development work is use Drupal's core colour module which allows the user to select the colours of certain areas.

This will just show you the basic code that is required for use with a theme using the PHPTemplate engine with some comments on what the code is doing at parts.

An alternative can be found in Shadowbox.

An example could be a blog using the Story content type but with an image field on each node and specially set up Views to display the information.
