The main problem with this is ending up with one theme for all, to get around this with out having to do any development work is use Drupal's core colour module which allows the user to select the colours of certain areas. Lightbox2 doesn't have a D7 release at the time of writing and Thickbox has been discontinued, with the maintainer now working on Colorbox.  
An alternative can be found in Shadowbox.  
This will just show you the basic code that is required for use with a theme using the PHPTempalte engine with some comments on what the code is doing at parts.
