This will just show you the basic code that is required for use with a theme using the PHPTemplate engine with some comments on what the code is doing at parts.

Sorry but I will be using the English spelling, too used to typing with the 'u'.

Lightbox2 doesn't have a D7 release at the time of writing and Thickbox has been discontinued, with the maintainer now working on Colorbox.

If you are setting this up a lot it can become tedious, or maybe it's the first time but you don't want to spend hours finding out what modules need to be installed to get the required result.
