Drupal 7 Posted: 27/09/2011 Creating a comma separated list of taxonomy terms for a node similar to Delicious where you can add a URL with an optional description and tags
The main problem with this is ending up with one theme for all, to get around this with out having to do any development work is use Drupal's core colour module which allows the user to select the colours of certain areas. An alternative can be found in Shadowbox.
Lightbox2 doesn't have a D7 release at the time of writing and Thickbox has been discontinued, with the maintainer now working on Colorbox.
This will just show you the basic code that is required for use with a theme using the PHPTempalte engine with some comments on what the code is doing at parts.
