Read more Creating a comma separated list of taxonomy terms for a node Saturday, 3 September, 2011 - 19:23

The following code snippet will provide a comma separated list of taxonomy terms for a given node.

If you are setting this up a lot it can become tedious, or maybe it's the first time but you don't want to spend hours finding out what modules need to be installed to get the required result.

Visiting <http://en.wikipedia.org/wiki/Special:Random> in your browser will automatically redirect to a random article and the code takes in to account the redirect and gives you the information on the last page in the redirect.

Sorry but I will be using the English spelling, too used to typing with the 'u'.
