more Use panels to override the node output in Drupal 7 Thursday, 18 August, 2011

Read more Getting a random Wikipedia article using PHP + cURL Thursday, 26 May, 2011 - 13:48 The following code gets a completely random page from Wikipedia and returns some HTML code with a link to the article.

Drupal features Development blog about PHP, HTML & CSS and Drupal Search this site: Blog

Sorry but I will be using the English spelling, too used to typing with the 'u'.

An example could be a blog using the Story content type but with an image field on each node and specially set up Views to display the information.

If you are setting this up a lot it can become tedious, or maybe it's the first time but you don't want to spend hours finding out what modules need to be installed to get the required result.

This will just show you the basic code that is required for use with a theme using the PHPTemplate engine with some comments on what the code is doing at parts.
